

Math 208 GH - Spring 2014 Virtual Class

Because of severe weather conditions, we lost a class meeting on Tuesday, January 28. We planned to finish with hyperbolic functions in this class. In order to make up the missed course work, please work through the following activities by Tuesday, February 18. If you have any questions, e-mail me, ask any time during class, stop by my office for help, or visit the Math Center. This material will be covered on the quiz on February 27.

Objective Hyperbolic Functions

Activity: [Watch video 1: Hyperbolic Functions](#) and
[Video 2: Inverse Hyperbolic Functions](#)

Additional Resources: [Handout](#) (sample worked out problems and more practice)
